

MERN Stack Summary

MERN Stack is a full-stack JavaScript framework used for developing modern web applications. It consists of MongoDB, Express.js, React, and Node.js.

MongoDB

MongoDB is a NoSQL, document-oriented database that stores data in JSON-like BSON format. It provides flexibility, scalability, and high performance.

Express.js

Express.js is a backend web framework for Node.js used to create APIs, handle routes, and manage middleware.

React

React is a frontend JavaScript library used to build reusable UI components. It uses a Virtual DOM for faster rendering.

Node.js

Node.js is a JavaScript runtime that allows execution of JavaScript on the server side. It uses an event-driven, non-blocking architecture.

Advantages

- Uses JavaScript across frontend and backend
- High scalability and performance
- Large developer community

Applications

- E-learning platforms
- E-commerce applications
- Social networking apps
